STYLISH STRAPS

Julie Karlitz, of Demarest, has introduced **STRAP-ITS**, a line of fun bra straps that attach to strapless or convertible bras. "We were tired of seeing our girls going out in outfits showing their bra straps," Karlitz says on her website. "We knew there had to be a way to wear fashion with class." Not seeing what she envisioned, she helped create it herself. The straps come in a variety of styles with different prints and nail heads. There's also a specially designed pattern for Play for P.I.N.K., which supports breast cancer research. A portion of proceeds for those straps are donated to the organization. For more information, visit strap-its.com.
